EDUCATION

BACHELOR IN SOFTWARE ENGINEERING, DEGREE LEVEL 2

Asia Pacific University of
Technology and Innovation,
2017-2021,

Referees are available upon request.

ABOUT ME

I am an international student from Kyrgyzstan currently taking Software Engineering degree level 3 at Asia Pacific University. I am a very ambitious person who always ensure my work will be completed on time. Moreover, I have innovative thinking skill that helped me to win the Malaysian International Young Inventors Olympiad in 2016 creating the safety capsule for airplane.

I am looking for a great team to get experience, share knowledge and achieve goals contributing into the community.

PROJECTS

- **Cross-platform mobile web-application DailyC - Fitness, using Ionic Framework and Firebase for backend and database.**
- Developed Amazon clone website.
- Developed Google clone website
- Contributed to APSpace Mobile Application for APU University

ACHIEVEMENTS

- MIYIO 2016 Gold Medal - project of Safety Capsule in airplane
- Taekwon-Do Black Belt 1st Dan & member of National team in Kyrgyzstan.

VOLUNTEERING

- Raised RM1000 by selling food which were funded to orphanage house.
- Conducted presentation about education abroad at high school in Kyrgyzstan, shared information about popular professions in IT industry, links for learning programming, helped with application processes to universities abroad.
- Gave self-defense Martial Arts classes at Sebat high school.
